Job Title	Date
UI Developer	January 2014
Department	**FLSA**
Product Management	Exempt
Supervisor	**Employment Status**
Director, UX/UI	Full Time

Purpose

The UX Developer is primarily responsible for the design and development of engaging user experiences for our web applications.

Accountabilities

- Work with our UX/design team to develop cutting-edge user interfaces for our flagship SaaS-based product
- Serve as a strong UI technical resource for the development team
- Develop standardized UI modules, tools, and libraries to speed time-to-market of our applications
- Assist with web accessibility and compliance efforts across our web applications

Position Requirements

- 3-5 years of cross-browser UI/UX development experience (experience with legacy browsers a plus) with JavaScript, jQuery, CSS 3, HTML 5, and one or two web development languages (PHP/Python/Ruby on Rails/Java/.NET)
- Excellent JavaScript skills are imperative - experience with MV* frameworks such as AngularJS, Knockout or Ember, and build tools such as Grunt a very strong plus
- Experience with CSS preprocessors such as LESS or SASS.
- Familiarity with responsive and adaptive development techniques.
- Experience consuming REST based web services via AJAX.
- Proven experience designing and developing for client-driven, consumer-facing websites
- Strong understanding of usability and design (experience with mobile web design a plus)
- Knowledge of web accessibility standards (i.e. WCAG 2.0 & WAI-ARIA)
- Working knowledge of Linux environments
- Familiarity with source code control systems (Subversion, Git, etc) and ticketing systems (JIRA, Greenhopper, etc)
